

SECURELY
for independence

Pro

Professional intelligent home care solution

Personalized and proactive care - allowing senior citizens to age at home independently

- Seamless monitoring - range of devices that track the resident's behavior
- For the family - monitoring apps with smart alerts for family members
- Expandable with additional sensors – smoke, flood, voice panic detector to further enhance safety
- Professional monitoring for emergencies and the ability for family or caregivers to receive notifications of anomalies and observe trends.
- Scalable and cost effective - enhanced with security and safety applications

SECURELY for independence constantly learns and adapts to the daily behavior of individuals and provides alerts to family or caregivers with different severity levels based on deviation from the daily routine. These personalized real time alerts enable timely prevention of possible deterioration in the senior's or disabled persons wellbeing.

End-to-End Solution for Service Providers

Unique Customer Experience

"I feel safe at home and am much more confident going about my day-to-day life. I am in good hands and know that my care-giver is looking after me. I don't need to change anything in my daily routine"

Personalized and Proactive

"The SECURELY for independence system learns my father's daily activities without needing him to activate anything. It is smart enough to alert me and the emergency services when something is wrong"
